## ABOUT ME

I am a passionate MERN stack graduate from Broadway Infosys, with a keen interest in app development. I am skilled in MongoDB, Express.js, React.js, and Node.js. I have a basic understanding of Docker and GitHub for version control. Committed to delivering excellence and eager to contribute and advance in software development.

## SKILLS

Programming language

- C/C++
- JavaScript

Web Script

- React
- Node
- MongoDB
- Express

## EXPERIENCE

### CRUD APP

Using Express and mongodb

- Developed CRUD application using Express.js and MongoDB.
- Implemented RESTful API endpoints for data manipulation.
- Ensured data integrity and scalability through efficient database design.

### AMAZON CLONE

Using React

<https://hungry-shockley-0bea14.netlify.app/>

- Created Amazon clone utilizing React, integrating Context API.
- Implemented seamless shopping experience with dynamic cart functionality.
- Utilized Context API for efficient management of cart state.

### OTHER

JavaScript project to-do-list

<https://github.com/kushalnepal/Javascript-to-do-list>

- Developed web-based to-do list using HTML, CSS, JavaScript.
- Implemented local storage for persistent task storage across sessions.
- Enabled task addition, editing, deletion for seamless task management.
